Total available tokens for circulation: 28 million

20% of the token (7 million IVOX tokens) will remain as a safeguard for future circulation, when the development team decides that it is a good time to put the assets into circulation.

TOKEN DISTRIBUTION

WHY IVOX?

IVOX is born from the need to integrate the citizens of Latin American countries to the social and economic development of cryptocurrencies through the Ethereum network, born as a decentralized token with multiple purposes, the main purposes of IVOX Token are:

- Generate an investment bag that works as a real asset-saving system, which turn allows to obtain savings returns from the gains obtained by the token and the company IVOX.
- To encourage the investment and use of cryptocurrencies in Latin America to improve the quality of life for people with a savings system.

Distribution of the funds obtained by pre-sales and Crowdfunding

Investing in New ICOS

The 10% of the earnings obtained are invested each month in the purchase of other ICOS, tokens and cryptocurrencies that are due to go to the market, or that are already circulating, will be prioritized in those that have as purpose the scientific research, to the technological development in cryptocurrencies, the sustainable development of communities, the preservation of the environment and humanitarian aid.

Humanitarian aid

10% of the earnings obtained are invested in humanitarian aid.

Development, infrastructure and mining

20% of the profits are invested in sustainable mining of cryptocurrencies and Ethereum to strengthen the development of the ERC technology and development of IVOX token to generate its own peer-to-peer exchange network, active mining and code development for help societies through intelligent contracts.

Administration and operation

10% of the profits are invested in the administration and operation of the network and the IVOX assets sales team.

OWN network development

20% of the profits are invested in the development of a second asset or Criptomonedas with improvements in its code, an own network and contract that allows to give economic sustainability to the investors in the Criptomonedas to obtain a rate of 3.5% monthly.

Marketing

20% of the proceeds will be allocated to all marketing actions to promote the use, purchase of the currency, benefits of acquiring it, Identity creation and brand value.

Reserve funds

The rest will go to a reserve fund to combat and prevent any kind of contingency.

HOW DOES IVOX WORK?

IVOX token will work during its first two years of life within the Ethereum network to ensure its effectiveness and will be always available within the Ethereum network.

IVOX token assets will be on sale via website: www.iVOXcoin.com

IVOX token will not be part of the company IVOX Mexico, when acquiring IVOX token do not buy shares in IVOX Mexico, but you can obtain a profitability of 3.5% per month of your invested tokens if they are in the Invest Box, which will be handled by the company IVOX Mexico. Each Invest Box is unique and non-transferable and has a unique and personal contract.

The active IVOX token can be sold and purchased at Exchanges or sales centers of cryptocurrencies; will be released at a price Equivalent to \$1.00 USD/ETH.

SALE OF SHARES OF THE COMPANY

20% of the assets of the company IVOX Mexico can be purchased. These assets will be on sale December 2019.

The investment by these assets of the company will be made in IVOX token. These assets shall not be transferable to a third party without prior approval by the Company committee and only up to 5% of the assets may be acquired by a natural or moral person, and investors may not be duplicated.

¿WHAT KIND OF ICOS SUPPORTÁ IVOX TOKEN?

IVOX token will use other technologies in cryptocurrencies within the enterprise platform and the development of the token with the same Ethereum network, we will use the service of Blockonomics for the money invested in the, will invest in Blockonomics Ico, will invest in UBEX Token as an intermediary for the development of its neural network technology for advertising development, GSI Token for the development of scientific publications and others that allow the development of science, will invest in tokens, IcoS and Cryptocurrencies to use their Funds In the care of the environment as SAM ICO, Swiss ALP Companys Energy, which provides sustainable energy mining of its assets, IVOX token will follow the same principle using and developing the mining of its assets tokens with the same principle of energy use 100% renewable, every month, The company's Directors and the development team of IVOX Token. Will make an evaluation of the best projects to invest and will follow up the profitability of each of these investments.

IVOX TOKEN FOR REMITTANCES

The remittances and exchange of dollars in Mexico, can be made by means of IVOX token, this token will have within its objectives that the people can realize the acquisition of assets IVOX token in all the countries and cities That their laws permit and the assets IVOX token may be exchanged at the lowest commission rate on the market to Mexican pesos, only within Mexico and for Mexican citizens, tourists or visitors, by means of payments via email.

HUMANITARIAN AID

COW is that IVOX will invest in humanitarian aid?

IVOX token and the work team will be responsible to distribute 10% of the company's profit each year through non-governmental institutions that help directly the Growth of the community on issues of terminal illness care, houses construction, Educational and cultural development around the world.

While the Cryptocurrencies approach is to support Latin America's economic development, it is not limited to supporting other countries outside the area and can invest in projects that benefit low-income people or who are in situations of risk or vulnerability.

OUR REASON FOR BEING

IVOX Token has objectives that must be very clear to the investor, the most important is to give sustainability to a solid economic source. Finish with Ponzi systems In the Cryptocurrencies and inflationary products of this nature, generating a saving system that is not based on a pyramidal structure, in which, a third party is required to invest to make a profit, otherwise, It's about investing in the market trends of the Cryptocurrencies and in its technological development to obtain profits that allow to have real numbers, not hype by means of this token, only real and calculated numbers to the global economy.

The purchase of new assets and solid assets of the market always goes uphill, the technologies change constantly grow the competition that composes to the market, this will give rise to that the market of which the profits are obtained is unlimited and growing, because the technologies in programming Like the use of cryptocurrencies and the block chains (Blockchain) of programming in other

everyday uses, will be more and more common until Be Daily use for any **Global** lawful exchange.

The second reason of IVOX token is to strengthen and improve the culture of using The Invest Box, IVOX is not a decentralized bank, but will meet the goal of improving people's economy and gradually helping the economy of developing countries to have a means of investment and savings with excellent Yields Starting with Mexico.

According to the achievements and The Success obtained we may expand to other countries and cities of Latin America.

Create the Exchange center within the applications from IVOX against Mexican Pesos and Currencies from other countries to get a better exchange rate between local currencies without paying money sends by SPEI Or Swift.

We have our clear objectives and the fact of starting this project within Mexico, does not limit to the investors of different countries to be part of this project, as long as it is done lawfully and without violating its local laws, taking into account that it is the Beginning of a globalized expansion to operate Where the laws Allow the use of cryptocurrencies, tokens and their derivatives.
